

P00: Half-Quick

Team Name: SaltBunnies

Roster: Emaan Asif, James Lei, Kiran Soemardjo, Lucas Zheng

TARGET SHIP DATE: 2025-11-10

Tasks + Assignments

Project Manager: Emaan

- Maintain Devlog/README.md
- Note changes in P00 deliverables/subgoals to teammates
- Oversee work being done
- Middleware development
 - Create middleware for authentication system (sign up, log in, log out)
 - Add styling for login/signup pages

Database: Kiran

- Create tables + initialize database
- Write functions to insert into table, select from table, and a general query
- Test all queries and add sample data
- Create follow system
 - People users follow will be displayed in profile.html
 - Follow button available on blogs

Middleware: James

- Create component map
- Create most components of flask app (__init__.py)
 - Convert between renderable blogs and db storage
 - Edit / displaying / creating new entries
 - Creating blogs / displaying a user's own blogs
- Link middleware, frontend, and database together for functional app
- Frontend development
 - Establish base.html
 - Add scroll functionality between blogs

Frontend: Lucas

- Create site map
- Create all html templates + using jinja (without CSS dependence)
 - blog.html / entry.html
 - home.html
 - login.html / signup.html
 - edit.html / create.html
 - profile.html
- Ensure navigation links work between pages
- Work with Middleware to display data
- style.css

Tables

Entries		
INTEGER	blog	FK REF blogs(id)
INTEGER	id	PK
DATETIME	date_created	
TEXT	content	
DATETIME	recent_edit	

Edits		
INTEGER	entry	FK REF entries(id)
DATETIME	timestamp	
TEXT	updated_content	

Profiles		
TEXT	username	PK
TEXT	password	

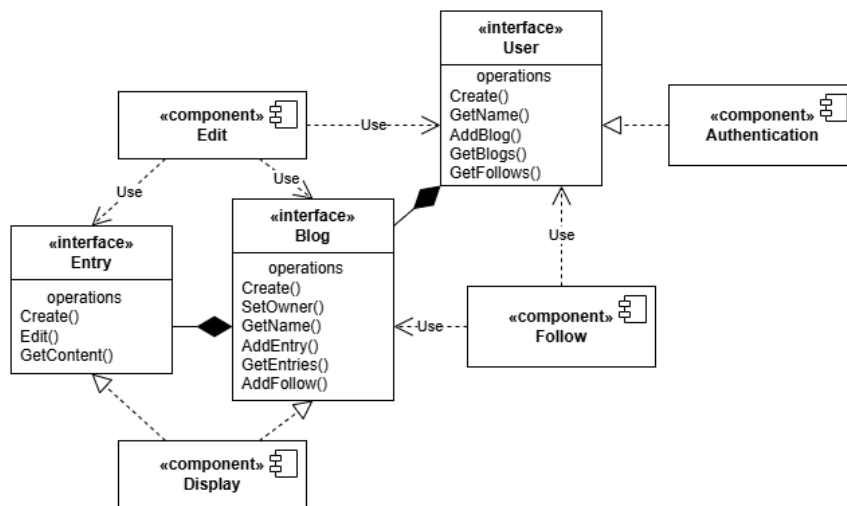

Follows		
TEXT	user	FK REF profiles(username)
INTEGER	blog	FK REF blogs(id)

Blogs		
INTEGER	id	PK
TEXT	title	UNIQUE
TEXT	author	FK REF profiles(username)
DATETIME	date_created	
INTEGER	follows	
INTEGER	views	

Components

- Edit Component: Allows users to create a blog, add entries to their blog, and edit those entries
- Authentication Component: Creates new users, logs in existing users
- Follow Component: Allow users to follow a blog
- Display Component: Displays existing blogs and entries

The edit component uses the Blog interface to create a new blog, and the User interface to link the new blog to a user. The Edit component uses the Entry interface to create or edit an entry, and the Blog interface to add the new entry to a blog. The Follow component uses the Blog and User interface to link a user to a blog via a follow.

Site map

- entry.html points to itself because users can scroll from one entry to the next within the same blog
